Leadership	Flexibility

AWARDS

Navy and Marine Corps Achievement Medal

Responded to a crisis situation, providing a consistent, accurate and timely stream of intelligence utilized by the highest levels of military and political leadership.

Joint Service Commendation Medal

For exceptional service as Tactical Maritime Watch Supervisor and Operations Training Manager. Led intelligence support to United States and Coalition forces engaged in Overseas Contingency Operations.

Navy and Marine Corps Achievement Medal

Organized operational travel for three deployed teams during COVID pandemic while continuing to support Task Force 51 and lead training for job qualifications.

SUMMARY

Full Stack Software Engineer leveraging 9 years of **Intelligence and Linguistics** experience to solve problems with a unique point of view. Roles such as Operations Training Manager, and Senior Language Analyst have fostered an **inquisitive, flexible and levelheaded mind** with a myriad of qualifications including an active **top secret clearance**.

EXPERIENCE

Full Stack Software Engineer Student

Code Platoon

February 2021 - May 2021

- Intensive, full-time coding bootcamp learned full stack software engineering, including Python, JavaScript, React, Django, SQL, HTML, and CSS. Gained professional-level knowledge of industry standards such as version control, testing, Agile processes and coding best practices.
- **NHL Fantasy Tracker App**
 - Created a full stack app utilizing **React, Django and PostgreSQL** that allowed users to create an account, build out their team and track when their players are playing while viewing key stats by leveraging NHL's undocumented API.
- **Road Trip Planning App**
 - Contributed to a full stack **React/Django** App giving users a personalized road trip experience finding the best route for stops that align with their and time/financial constraints. Connected the application to **Google Maps and Places' API**, setting up a proxy to make API calls on user input instead of all at once so responses could be loaded more efficiently into the final page and decreased load times.

Persian-Farsi Language Analyst

US Navy: NSA - Georgia, Air Operations

November 2012 - Present

- Provided foreign language and subject matter expertise to analyze target communications and produce time sensitive intelligence products that enabled U.S. and allied intelligence agencies, and military operations.
- Managed training programs, which included publishing qualification guidelines, operating procedures, and training material. Trained peers to help increase qualification timelines and mission readiness.
- Drafted and presented intelligence briefs to senior Navy officers and contributed to reports that were presented to highest levels of DoD and NSA officials.
- Coordinated with several NSA internal organizations to deconflict asset coverage when collection requirements weren't being met for mission critical departments during times of heightened tensions.

EDUCATION

Code Platoon Boot Camp

Full Stack Software Engineering

February 2021 - May 2021

Defense Language Institute

AA in Persian-Farsi

March 2014 - October 2018
